

Switzerland, officially the **Swiss Confederation**, is a landlocked country located in west-central Europe.^{[e][13]} It is bordered by Italy to the south, France to the west, Germany to the north and Austria and Liechtenstein to the east. Switzerland is geographically divided among the Swiss Plateau, the Alps and the Jura; the Alps occupy the greater part of the territory, whereas most of the country's population of 9 million are concentrated on the plateau, which hosts its largest cities and economic centres, including Zürich, Geneva, and Basel.^[14]

Switzerland originates from the Old Swiss Confederacy established in the Late Middle Ages, following a series of military successes against Austria and Burgundy; the Federal Charter of 1291 is considered the country's founding document. Swiss independence from the Holy Roman Empire was formally recognised in the Peace of Westphalia in 1648. Switzerland has maintained a policy of armed neutrality since the 16th century and has not fought an international war since 1815. It joined the United Nations only in 2002 but pursues an active foreign policy that includes frequent involvement in peace building.^[15]

Switzerland is the birthplace of the Red Cross and hosts the headquarters or offices of most major international institutions, including the WTO, the WHO, the ILO, FIFA, and the UN. It is a founding member of the European Free Trade Association (EFTA), but not part of the European Union (EU), the European Economic Area, or the eurozone; however, it participates in the European single market and the Schengen Area. Switzerland is a federal republic composed of 26 cantons, with federal authorities based in Bern.^{[a][2][1]}

Switzerland is one of the world's most developed countries, with the highest nominal wealth per adult^[16] and the eighth-highest gross domestic product (GDP) per capita.^{[17][18]} Switzerland ranks first in the Human Development Index since 2021 and performs highly also on several international metrics, including economic competitiveness and democratic governance. Cities such as Zürich, Geneva and Basel rank among the highest in terms of quality of life,^{[19][20]} albeit with some of the highest costs of living.^[21]

It has four main linguistic and cultural regions: German, French, Italian and Romansh. Although most Swiss are German-speaking, national identity is fairly cohesive, being rooted in a common historical background, shared values such as federalism and direct democracy,^[22] and Alpine symbolism.^{[23][24]} Swiss identity transcends language, ethnicity, and religion, leading to Switzerland being described as a Willensnation ("nation of volition") rather than a nation state.^[25] Due to its linguistic diversity, Switzerland is known by multiple native names: *Schweiz* [ˈʃvaɪts]^[f] (German),^[g] *Suisse* [sɥis(ə)] 🇨🇭 [ⓘ] (French); *Svizzera* [ˈzvittsera] (Italian); and *Svizra* [ˈʒviːtsrɐ, ˈʒviːtsʁɐ]^[h] (Romansh). On coins and stamps, the Latin name, *Confoederatio Helvetica*—frequently shortened to "Helvetia"—is used instead of the spoken languages.

Etymology

The English name *Switzerland* is a portmanteau of *Switzer*, an obsolete term for a Swiss person which was in use during the 16th to 19th centuries, and *land*.^[26] The English adjective *Swiss* is a loanword from French *Suisse*, also in use since the 16th century. The name *Switzer* is from the Alemannic *Schwiizer*, in origin an inhabitant of *Schwyz* and its associated territory, one of the *Waldstätte* cantons which formed the nucleus of the Old Swiss Confederacy. The Swiss began to adopt the name for themselves after the Swabian War of 1499, used alongside the term for "Confederates", *Eidgenossen* (literally: *comrades by oath*), used since the 14th century. The data code for Switzerland, CH, is derived from Latin *Confoederatio Helvetica* (*Helvetic Confederation*).

The toponym *Schwyz* itself was first attested in 972, as Old High German *Suittes*, perhaps related to *swedan* 'to burn' (cf. Old Norse *svíða* 'to singe, burn'), referring to the area of forest that was burned and cleared to build.^[27] The name was extended to the area dominated by the canton, and after the Swabian War of 1499 gradually came to be used for the entire Confederation.^{[28][29]} The Swiss German name of the country, *Schwiiz*, is homophonous to that of the canton and the settlement, but distinguished by the use of the definite article (*d'Schwiiz* for the Confederation,^[30] but simply *Schwyz* for the canton and the town).^[31] The long [iː] of Swiss German is historically and still often today spelled ⟨y⟩ rather than ⟨ii⟩, preserving the original identity of the two names even in writing.

The Latin name *Confoederatio Helvetica* was neologised and introduced gradually after the formation of the federal state in 1848, harking back to the Napoleonic Helvetic

Republic. It appeared on coins from 1879, inscribed on the Federal Palace in 1902 and after 1948 used in the official seal^[32] (e.g., the ISO banking code "CHF" for the Swiss franc, and the country top-level domain ".ch", are both taken from the state's Latin name). *Helvetica* is derived from the *Helvetii*, a Gaulish tribe living on the Swiss Plateau before the Roman era.

Helvetia appeared as a national personification of the Swiss confederacy in the 17th century in a 1672 play by Johann Caspar Weissenbach.^[33]

History

The state of Switzerland took its present form with the adoption of the Swiss Federal Constitution in 1848. Switzerland's precursors established a defensive alliance in 1291, forming a loose confederation that persisted for centuries.

Beginnings

The oldest traces of hominid existence in Switzerland date to about 150,000 years ago.^[34] The oldest known farming settlements in Switzerland, which were found at Gächlingen, date to around 5300 BC.^[34]

The earliest known tribes formed the Hallstatt and La Tène cultures, named after the archaeological site of La Tène on the north side of Lake Neuchâtel. La Tène culture developed and flourished during the late Iron Age from around 450 BC,^[34] possibly influenced by Greek and Etruscan civilisations. One of the most important tribal groups was the Helvetii. Steadily harassed by Germanic tribes, in 58 BC, the Helvetii decided to abandon the Swiss Plateau and migrate to western Gallia. Julius Caesar's armies pursued and defeated them at the Battle of Bibracte, in today's eastern France, forcing the tribe to move back to its homeland.^[34] In 15 BC, Tiberius (later the second Roman emperor) and his brother Drusus conquered the Alps, integrating them into the Roman Empire. The area occupied by the Helvetii first became part of Rome's Gallia Belgica province and then of its Germania Superior province. The eastern portion of modern Switzerland was integrated into the Roman province of Raetia. Sometime around the start of the Common Era, the Romans maintained a large camp called Vindonissa, now a ruin at the confluence of the Aare and Reuss rivers, near the town of Windisch.^[36]

Founded in 44 BC by Lucius Munatius Plancus, Augusta Raurica (near Basel) was the first Roman settlement on the Rhine and is now among the most important archaeological sites in Switzerland.^[35]

The first and second century AD was an age of prosperity on the Swiss Plateau. Towns such as Aventicum, Iulia Equestris and Augusta Raurica, reached a remarkable size, while hundreds of agricultural estates (*Villae rusticae*) were established in the countryside.

Around 260 AD, the fall of the Agri Decumates territory north of the Rhine transformed today's Switzerland into a frontier land of the Empire. Repeated raids by the Alamanni tribes provoked the ruin of the Roman towns and economy, forcing the population to shelter near Roman fortresses, like the Castrum Rauracense near Augusta Raurica. The Empire built another line of defence at the north border (the so-called Donau-Ilser-Rhine-Limes). At the end of the fourth century, the increased Germanic pressure forced the Romans to abandon the linear defence concept. The Swiss Plateau was finally open to Germanic tribes.

In the Early Middle Ages, from the end of the fourth century, the western extent of modern-day Switzerland was part of the territory of the Kings of the Burgundians. The Alemanni settled the Swiss Plateau in the fifth century and the valleys of the Alps in the eighth century, forming Alemannia. Modern-day Switzerland was then divided between the kingdoms of Alemannia and Burgundy.^[34] The entire region became part of the expanding Frankish Empire in the sixth century, following Clovis I's victory over the Alemanni at Tolbiac in 504 AD, and later Frankish domination of the Burgundians.^{[37][38]}

Throughout the rest of the sixth, seventh and eighth centuries, Swiss regions continued under Frankish hegemony (Merovingian and Carolingian dynasties) but after its extension under Charlemagne, the Frankish Empire was divided by the Treaty of Verdun in 843.^[34] The territories of present-day Switzerland became divided into Middle Francia and East Francia until they were reunified under the Holy Roman Empire around 1000 AD.^[34]

By 1200, the Swiss Plateau comprised the dominions of the houses of Savoy, Zähringer, Habsburg, and Kyburg.^[34] Some regions (Uri, Schwyz, Unterwalden, later known as Waldstätten) were accorded the Imperial immediacy to grant the empire direct control over the mountain passes. With the extinction of its male line in 1263, the Kyburg dynasty fell in AD 1264. The Habsburgs under King Rudolph I (Holy Roman Emperor in 1273) laid claim to the Kyburg lands and annexed them, extending their territory to the eastern Swiss Plateau.^[37]

Old Swiss Confederacy

The Old Swiss Confederacy was an alliance among the valley communities of the central Alps. The Confederacy was governed by nobles and patricians of various cantons who facilitated management of common interests and ensured peace on mountain trade routes. The Federal Charter of 1291 is considered the confederacy's founding document, even though similar alliances likely existed decades earlier. The document was agreed among the rural communes of Uri, Schwyz, and Unterwalden.^{[39][40]}

By 1353, the three original cantons had joined with the cantons of Glarus and Zug and the Lucerne, Zürich and Bern city-states to form the "Old Confederacy" of eight states that obtained through the end of the 15th century.^[40] The expansion led to increased power and wealth for the confederation. By 1460, the confederates controlled most of the territory south and west of the Rhine to the Alps and the Jura mountains, and the University of Basel was founded (with a faculty of medicine) establishing a tradition of chemical and medical research. This increased after victories against the Habsburgs (Battle of Sempach, Battle of Näfels), over Charles the Bold of Burgundy during the 1470s, and the success of the Swiss mercenaries. The Swiss victory in the Swabian War against the Swabian League of Emperor Maximilian I in 1499 amounted to *de facto* independence within the Holy Roman Empire.^[40] In 1501, Basel^[41] and Schaffhausen joined the Old Swiss Confederacy.^[42]

The Confederacy acquired a reputation of invincibility during these earlier wars, but expansion of the confederation suffered a setback in 1515 with the Swiss defeat in the Battle of Marignano. This ended the so-called "heroic" epoch of Swiss history.^[40] The success of Zwingli's Reformation in some cantons led to inter-cantonal religious conflicts in 1529 and 1531 (Wars of Kappel). It was not until more than one hundred years after these internal wars that, in 1648, under the Peace of Westphalia, European countries recognised Switzerland's independence from the Holy Roman Empire and its neutrality.^{[37][38]}

The Old Swiss Confederacy from 1291 (dark green) to the sixteenth century (light green) and its associates (blue). In the other colours shown are the subject territories.

The 1291 *Bundesbrief* (federal charter)

During the Early Modern period of Swiss history, the growing authoritarianism of the patriciate families combined with a financial crisis in the wake of the Thirty Years' War led to the Swiss peasant war of 1653. In the background to this struggle, the conflict between Catholic and Protestant cantons persisted, erupting in further violence at the First War of Villmergen, in 1656, and the Toggenburg War (or Second War of Villmergen), in 1712.^[40]

Napoleonic era

In 1798, the revolutionary French government invaded Switzerland and imposed a new unified constitution.^[40] This centralised the government of the country, effectively abolishing the cantons: moreover, Mülhausen left Switzerland and the Valtellina valley became part of the Cisalpine Republic. The new regime, known as the Helvetic Republic, was highly unpopular. An invading foreign army had imposed and destroyed centuries of tradition, making Switzerland nothing more than a French satellite state. The fierce French suppression of the Nidwalden Revolt in September 1798 was an example of the oppressive presence of the French Army and the local population's resistance to the occupation.

The Act of Mediation was Napoleon's attempt at a compromise between the Ancien Régime and a Republic.

When war broke out between France and its rivals, Russian and Austrian forces invaded Switzerland. The Swiss refused to fight alongside the French in the name of the Helvetic Republic. In 1803 Napoleon organised a meeting of the leading Swiss politicians from both sides in Paris. The Act of Mediation was the result, which largely restored Swiss autonomy and introduced a Confederation of 19 cantons.^[40] Henceforth, much of Swiss politics would concern balancing the cantons' tradition of self-rule with the need for a central government.

In 1815 the Congress of Vienna fully re-established Swiss independence, and the European powers recognised permanent Swiss neutrality.^{[37][38][40]} Swiss troops served foreign governments until 1860 when they fought in the siege of Gaeta. The treaty allowed Switzerland to increase its territory, with the admission of the cantons of Valais, Neuchâtel and Geneva. Switzerland's borders saw only minor adjustments thereafter.^[43]

Federal state

The restoration of power to the patriciate was only temporary. After a period of unrest with repeated violent clashes, such as the Züriputsch of 1839, civil war (the Sonderbundskrieg) broke out in 1847 when some Catholic cantons tried to set up a separate alliance (the Sonderbund).^[40] The war lasted less than a month, causing fewer than 100 casualties, most of which were through friendly fire. The Sonderbundskrieg had a significant impact on the psychology and society of Switzerland.

The war convinced most Swiss of the need for unity and strength. Swiss from all strata of society, whether Catholic or Protestant, from the liberal or conservative current, realised that the cantons would profit more from merging their economic and religious interests.

Thus, while the rest of Europe saw revolutionary uprisings, the Swiss drew up a constitution that provided for a federal layout, much of it inspired by the American example. This constitution provided central authority while leaving the cantons the right to self-government on local issues. Giving credit to those who favoured the power of the cantons (the Sonderbund Kantone), the national assembly was divided

The first Federal Palace in Bern (1857). One of the three cantons presiding over the Tagsatzung (former legislative and executive council), Bern was chosen as the permanent seat of federal legislative and executive institutions in 1848, in part because of its closeness to the French-speaking area.^[4]

between an upper house (the Council of States, two representatives per canton) and a lower house (the National Council, with representatives elected from across the country). Referendums were made mandatory for any amendments.^[38] This new constitution ended the legal power of nobility in Switzerland.^[44]

Inauguration in 1882 of the Gotthard rail tunnel connecting the southern canton of Ticino, the longest in the world at the time

A single system of weights and measures was introduced, and in 1850 the Swiss franc became the Swiss single currency, complemented by the WIR franc in 1934.^[45] Article 11 of the constitution forbade sending troops to serve abroad, marking the end of foreign service. It came with the expectation of serving the Holy See, and the Swiss were still obliged to serve Francis II of the Two Sicilies with Swiss Guards present at the siege of Gaeta in 1860.

An important clause of the constitution was that it could be entirely rewritten, if necessary, thus enabling it to evolve as a whole rather than being modified one amendment at a time.^[46]

This need soon proved itself when the rise in population and the Industrial Revolution that followed led to calls to modify the constitution accordingly. The population rejected an early draft in 1872, but modifications led to its acceptance in 1874.^[40] It introduced the facultative referendum for laws at the federal level. It also established federal responsibility for defence, trade, and legal matters.

In 1891, the constitution was revised with uncommonly strong elements of direct democracy, which remain unique today.^[40]

Modern history

Switzerland was not invaded during either of the world wars. During World War I, Switzerland was home to the revolutionary and founder of the Soviet Union Vladimir Illych Ulyanov (Vladimir Lenin) who remained there until 1917.^[47] Swiss neutrality was seriously questioned by the short-lived Grimm–Hoffmann affair in 1917. In 1920, Switzerland joined the League of Nations, which was based in Geneva, after it was exempted from military requirements.^[48]

During World War II, detailed invasion plans were drawn up by the Germans,^[49] but Switzerland was never attacked.^[50] Switzerland was able to remain independent through a combination of military deterrence, concessions to Germany, and good fortune, as larger events during the war intervened.^{[38][51]} General Henri Guisan, appointed the commander-in-chief for the duration of the war ordered a general mobilisation of the armed forces. The Swiss military strategy changed from static defence at the borders to organised long-term attrition and withdrawal to strong, well-stockpiled positions high in the Alps, known as the Reduit. Switzerland was an important base for espionage by both sides and often mediated communications between the Axis and Allied powers.^[51]

General Ulrich Wille, appointed commander-in-chief of the Swiss Army for the duration of World War I

Switzerland's trade was blockaded by both the Allies and the Axis. Economic cooperation and extension of credit to Nazi Germany varied according to the perceived likelihood of invasion and the availability of other trading partners. Concessions reached a peak after a crucial rail link through Vichy France was severed in 1942, leaving Switzerland (together with Liechtenstein) entirely isolated from the wider world by Axis-controlled territory. Over the course of the war, Switzerland interned over 300,000 refugees^[52] aided by the International Red Cross, based in Geneva. Strict immigration and asylum policies and the financial relationships with Nazi Germany raised controversy, only at the end of the 20th century.^{[53]:521}

During the war, the Swiss Air Force engaged aircraft of both sides, shooting down 11 intruding Luftwaffe planes in May and June 1940, then forcing down other intruders after a change of policy following threats from Germany. Over 100 Allied bombers and their crews were interned. Between 1940 and 1945, Switzerland was bombed by the Allies, causing fatalities and property damage.^[51] Among the cities and towns bombed were Basel, Brusio, Chiasso, Cornol, Geneva, Koblentz, Niederweningen, Rafz, Renens, Samedan, Schaffhausen, Stein am Rhein, Tägerwilten, Thayngen, Vals, and Zürich. Allied forces maintained that the bombings, which violated the 96th Article of War, resulted from navigation errors, equipment failure, weather conditions, and pilot errors. The Swiss expressed fear and concern that the bombings were intended to put pressure on Switzerland to end economic cooperation and neutrality with Nazi Germany.^[54] Court-martial proceedings took place in England. The US paid SFR 62M for reparations.

Switzerland's attitude towards refugees was complicated and controversial; over the course of the war, it admitted as many as 300,000 refugees^[52] while refusing tens of thousands more,^{[53]:107} including Jews persecuted by the Nazis.^{[53]:114}

After the war, the Swiss government exported credits through the charitable fund known as the *Schweizerspende* and donated to the Marshall Plan to help Europe's recovery, efforts that ultimately benefited the Swiss economy.^{[53]:521}

During the Cold War, Swiss authorities considered the construction of a Swiss nuclear bomb.^[55] Leading nuclear physicists at the Federal Institute of Technology Zürich such as Paul Scherrer made this a realistic possibility.^[56] In 1988, the Paul Scherrer Institute was founded in his name to explore the therapeutic uses of neutron scattering technologies.^[57] Financial problems with the defence budget and ethical considerations prevented the substantial funds from being allocated, and the Nuclear Non-Proliferation Treaty of 1968 was seen as a valid alternative. Plans for building nuclear weapons were dropped by 1988.^[58] Switzerland joined the Council of Europe in 1963.^[38]

Switzerland was the last Western republic (the Principality of Liechtenstein followed in 1984) to grant women the right to vote. Some Swiss cantons approved this in 1959, while at the federal level, it was achieved in 1971^{[50][59]} and, after resistance, in the last canton Appenzell Innerrhoden (one of only two remaining Landsgemeinde, along with Glarus) in 1990. After obtaining suffrage at the federal level, women quickly rose in political significance. The first woman on the seven-member Federal Council executive was Elisabeth Kopp, who served from 1984 to 1989,^[50] and the first female president was Ruth Dreifuss in 1999.^[60]

In 1979 areas from the canton of Bern attained independence from the Bernese, forming the new canton of Jura. On 18 April 1999, the Swiss population and the cantons voted in favour of a completely revised federal constitution.^[50]

In 2002 Switzerland became a full member of the United Nations, leaving Vatican City as the last widely recognised state without full UN membership. Switzerland is a founding member of the EFTA but not the European Economic Area (EEA). An application for membership in the European Union was sent in May 1992, but did not advance since rejecting the EEA in December 1992^[50] when Switzerland conducted a referendum on the EEA. Several referendums on the EU issue ensued; due to opposition from the citizens, the membership application was withdrawn. Nonetheless, Swiss law is gradually changing to conform with that of the EU, and the government signed bilateral agreements with the European Union. Switzerland, together with Liechtenstein, has been surrounded by the EU since Austria's entry in 1995. On 5 June 2005, Swiss voters agreed by a 55% majority to join the Schengen treaty, a result that EU commentators regarded as a sign of support.^[38] In

In 2003, by granting the Swiss People's Party a second seat in the governing cabinet, the Parliament altered the coalition that had dominated Swiss politics since 1959.

September 2020, a referendum calling for a vote to end the pact that allowed a free movement of people from the European Union was introduced by the Swiss People's Party (SVP).^[61] However, voters rejected the attempt to retake control of immigration, defeating the motion by a roughly 63%–37% margin.^[62]

On 9 February 2014, 50.3% of Swiss voters approved a ballot initiative launched by the Swiss People's Party (SVP/UDC) to restrict immigration. This initiative was mostly backed by rural (57.6% approval) and suburban groups (51.2% approval), and isolated towns (51.3% approval) as well as by a strong majority (69.2% approval) in Ticino, while metropolitan centres (58.5% rejection) and the French-speaking part (58.5% rejection) rejected it.^[63] In December 2016, a political compromise with the EU was attained that eliminated quotas on EU citizens, but still allowed favourable treatment of Swiss-based job applicants.^[64] On 27 September 2020, 62% of Swiss voters rejected the anti-free movement referendum by SVP.^[65]

Geography

Extending across the north and south side of the Alps in west-central Europe, Switzerland encompasses diverse landscapes and climates across its 41,285 square kilometres (15,940 sq mi).^[66]

Switzerland lies between latitudes 45° and 48° N, and longitudes 5° and 11° E. It contains three basic topographical areas: the Swiss Alps to the south, the Swiss Plateau or Central Plateau, and the Jura mountains on the west. The Alps are a mountain range running across the central and south of the country, constituting about 60% of the country's area. The majority of the population live on the Swiss Plateau. The Swiss Alps host many glaciers, covering 1,063 square kilometres (410 sq mi). From these originate the headwaters of several major rivers, such as the Rhine, Inn, Ticino and Rhône, which flow in the four cardinal directions, spreading across Europe. The hydrographic network includes several of the largest bodies of fresh water in Central and Western Europe, among which are Lake Geneva (Lac Léman in French), Lake Constance (Bodensee in German) and Lake Maggiore. Switzerland has more than 1500 lakes and contains 6% of Europe's freshwater stock. Lakes and glaciers cover about 6% of the national territory. Lake Geneva is the largest lake and is shared with France. The Rhône is both the main source and outflow of Lake Geneva. Lake Constance is the second largest and, like Lake Geneva, an intermediate step by the Rhine at the border with Austria and Germany. While the Rhône flows into the Mediterranean Sea at the French Camargue region and the Rhine flows into the North Sea at Rotterdam, about 1,000 kilometres (620 miles) apart, both springs are only about 22 kilometres (14 miles) apart in the Swiss Alps.^{[66][67]}

Physical map of Switzerland (in German)

Contrasted landscapes between the regions of the Matterhorn and Lake Lucerne

Forty-eight mountains are 4,000 metres (13,000 ft) or higher in height.^[66] At 4,634 m (15,203 ft), Monte Rosa is the highest, although the Matterhorn (4,478 m or 14,692 ft) is the best known. Both are located within the Pennine Alps in the canton of Valais, on the border with Italy. The section of the Bernese Alps above the deep glacial Lauterbrunnen valley, containing 72 waterfalls, is well known for the Jungfrau (4,158 m or 13,642 ft) Eiger and Mönch peaks, and its many picturesque valleys. In the southeast the long Engadin Valley, encompassing St. Moritz, is also well known; the highest peak in the neighbouring Bernina Alps is Piz Bernina (4,049 m or 13,284 ft).^[66]

The Swiss Plateau has greater open and hilly landscapes, partly forested, partly open pastures, usually with grazing herds or vegetable and fruit fields, but it is still hilly. Large lakes and the biggest Swiss cities are found there.^[66]

Switzerland contains two small enclaves: Büdingen belongs to Germany, while Campione d'Italia belongs to Italy.^[68] Switzerland has no exclaves.

Climate

The Swiss climate is generally temperate, but can vary greatly across localities,^[69] from glacial conditions on the mountaintops to the near-Mediterranean climate at Switzerland's southern tip. Some valley areas in the southern part of Switzerland offer cold-hardy palm trees. Summers tend to be warm and humid at times with periodic rainfall, ideal for pastures/grazing. The less humid winters in the mountains may see weeks-long intervals of stable conditions. At the same time, the lower lands tend to suffer from inversion during such periods, hiding the sun.

Köppen-Geiger climate classification map for Switzerland

A weather phenomenon known as the föhn (with an identical effect to the chinook wind) can occur any time and is characterised by an unexpectedly warm wind, bringing low relative humidity air to the north of the Alps during rainfall periods on the south-facing slopes. This works both ways across the alps but is more efficient if blowing from the south due to the steeper step for oncoming wind. Valleys running south to north trigger the best effect. The driest conditions persist in all inner alpine valleys that receive less rain because arriving clouds lose a lot of their moisture content while crossing the mountains before reaching these areas. Large alpine areas such as Graubünden remain drier than pre-alpine areas, and as in the main valley of the Valais, wine grapes are grown there.^[70]

The wettest conditions persist in the high Alps and in the Ticino canton, which has much sun yet heavy bursts of rain from time to time.^[70] Precipitation tends to be spread moderately throughout the year, with a peak in summer. Autumn is the driest season, winter receives less precipitation than summer, yet the weather patterns in Switzerland are not in a stable climate system. They can vary from year to year with no strict and predictable periods.

Environment

Switzerland contains two terrestrial ecoregions: Western European broadleaf forests and Alps conifer and mixed forests.^[71]

Switzerland's many small valleys separated by high mountains often host unique ecologies. The mountainous regions themselves offer a rich range of plants not found at other altitudes. The climatic, geological and topographical conditions of the alpine region make for a fragile ecosystem that is particularly sensitive to climate change.^{[69][72]} According to the 2014 Environmental Performance Index, Switzerland ranks first among 132 nations in safeguarding the environment, due to its high scores on environmental public health, its heavy reliance on renewable sources of energy (hydropower and geothermal energy), and its level of greenhouse gas emissions.^[73] In 2020 it was ranked third out of 180 countries.^[74] The country pledged to cut GHG emissions by 50% by 2030 compared to the level of 1990 and plans to reach zero emissions by 2050.^[75]

However, access to biocapacity in Switzerland is far lower than the world average. In 2016, Switzerland had 1.0 hectares^[76] of biocapacity per person within its territory, 40 per cent less than world average of 1.6. In contrast, in 2016, Swiss consumption required 4.6 hectares of biocapacity – their ecological footprint, 4.6 times as much as

Swiss territory can support. The remainder comes from other countries and the shared resources (such as the atmosphere impacted by greenhouse gas emissions).^[76] Switzerland had a 2019 Forest Landscape Integrity Index mean score of 3.53/10, ranking it 150th globally out of 172 countries.^[77]

Urbanisation

About 85% of the population live in urban areas.^{[78][79]} Switzerland went from a largely rural country to an urban one from 1930 to 2000. After 1935 urban development claimed as much of the Swiss landscape as it did during the prior 2,000 years. Urban sprawl affects the plateau, the Jura and the Alpine foothills,^[80] raising concerns about land use.^[81] During the 21st century, population growth in urban areas is higher than in the countryside.^[79]

Urbanisation in the Rhone Valley (outskirts of Sion)

Switzerland has a dense network of complementary large, medium and small towns.^[79] The plateau is densely populated with about 400 people per km² and the landscape shows uninterrupted signs of human presence.^[82] The weight of the largest metropolitan areas – Zürich, Geneva–Lausanne, Basel and Bern – tend to increase.^[79] The importance of these urban areas is greater than their population suggests.^[79] These urban centers are recognised for their high quality of life.^[83]

The average population density in 2019 was 215.2 inhabitants per square kilometre (557/sq mi).^{[84]:79} In the largest canton by area, Graubünden, lying entirely in the Alps, population density falls to 28.0 inhabitants per square kilometre (73/sq mi).^{[84]:30} In the canton of Zürich, with its large urban capital, the density is 926.8 per square kilometre (2,400/sq mi).^{[84]:76}

Government and politics

The Federal Constitution adopted in 1848 is the legal foundation of Switzerland's federal state.^[85] A new Swiss Constitution was adopted in 1999 that did not introduce notable changes to the federal structure. It outlines rights of individuals and citizen participation in public affairs, divides the powers between the Confederation and the cantons and defines federal jurisdiction and authority. Three main bodies govern on the federal level:^[86] the bicameral parliament (legislative), the Federal Council (executive) and the Federal Court (judicial).

The Federal Palace, seat of the Federal Assembly and the Federal Council

Parliament

The Swiss Parliament consists of two houses: the Council of States which has 46 representatives (two from each canton and one from each half-canton) who are elected under a system determined by each canton, and the National Council, which consists of 200 members who are elected under a system of proportional representation, reflecting each canton's population. Members serve part-time for four years (a *Milizsystem* or citizen legislature).^[87] When both houses are in joint session, they are known collectively as the Federal Assembly. Through referendums, citizens may challenge any law passed by parliament and, through initiatives, introduce amendments to the federal constitution, thus making Switzerland a direct democracy.^[85]

Federal Council

The Federal Council directs the federal government, the federal administration, and serves as a collective head of state. It is a collegial body of seven members, elected for a four-year term by the Federal Assembly, which also oversees the council. The President of the Confederation is elected by the Assembly from among the seven members, traditionally in rotation and for a one-year term; the President chairs the government and executes representative functions. The president is a *primus inter pares* with no additional powers and remains the head of a department within the administration.^[85]

The Swiss Federal Council in 2024 (from left to right) Viktor Rossi (Federal chancellor), Élisabeth Baume-Schneider, Ignazio Cassis, Karin Keller-Sutter, Viola Amherd (President in 2024), Guy Parmelin, Albert Rösti, Beat Jans

The government has been a coalition of the four major political parties since 1959, each party having a number of seats that roughly reflects its share of the electorate and representation in the federal parliament. The classic distribution of two CVP/PDC, two SPS/PSS, two FDP/PRD and one SVP/UDC as it stood from 1959 to 2003 was known as the "magic formula". Following the 2015 Federal Council elections, the seven seats in the Federal Council were distributed as follows:

- 1 seat for the Center Party (Die Mitte),^[i]
- 2 seats for the Free Democratic Party (FDP/PRD),
- 2 seats for the Social Democratic Party (SPS/PSS),
- 2 seats for the Swiss People's Party (SVP/UDC).

Supreme Court

The function of the Federal Supreme Court is to hear appeals against rulings of cantonal or federal courts. The judges are elected by the Federal Assembly for six-year terms.^[88]

Direct democracy

Direct democracy and federalism are hallmarks of the Swiss political system.^[89] Swiss citizens are subject to three legal jurisdictions: the municipality, canton and federal levels. The 1848 and 1999 Swiss Constitutions define a system of direct democracy (sometimes called half-direct or representative direct democracy because it includes institutions of a representative democracy). The instruments of this system at the federal level, known as popular rights (German: *Volksrechte*, French: *droits populaires*, Italian: *diritti popolari*),^[90] include the right to submit a federal initiative and a referendum, both of which may overturn parliamentary decisions.^{[85][91]}

The Landsgemeinde is an old form of direct democracy, still in practice in two cantons.

By calling a federal referendum, a group of citizens may challenge a law passed by parliament by gathering 50,000 signatures against the law within 100 days. If so, a national vote is scheduled where voters decide by a simple majority whether to accept or reject the law. Any eight cantons can also call a constitutional referendum on federal law.^[85]

Similarly, the federal *constitutional initiative* allows citizens to put a constitutional amendment to a national vote, if 100,000 voters sign the proposed amendment within 18 months.^[j] The Federal Council and the Federal Assembly can supplement the proposed amendment with a counterproposal. Then, voters must indicate a preference on the ballot if both proposals are accepted. Constitutional amendments, whether introduced by initiative or in parliament, must be accepted by a double majority of the national popular vote and the popular cantonal votes.^{[k][89]}

Cantons

The Swiss Confederation consists of 26 cantons:^{[85][92]}

Canton	ID	Capital	Canton	ID	Capital
 <u>Aargau</u>	19	<u>Aarau</u>	 <u>*Nidwalden</u>	7	<u>Stans</u>
 <u>*Appenzell Ausserrhoden</u>	15	<u>Herisau</u>	 <u>*Obwalden</u>	6	<u>Sarnen</u>
 <u>*Appenzell Innerrhoden</u>	16	<u>Appenzell</u>	 <u>Schaffhausen</u>	14	<u>Schaffhausen</u>
 <u>*Basel-Landschaft</u>	13	<u>Liestal</u>	 <u>Schwyz</u>	5	<u>Schwyz</u>
 <u>*Basel-Stadt</u>	12	<u>Basel</u>	 <u>Solothurn</u>	11	<u>Solothurn</u>
 <u>Bern</u>	2	<u>Bern</u>	 <u>St. Gallen</u>	17	<u>St. Gallen</u>
 <u>Fribourg</u>	10	<u>Fribourg</u>	 <u>Thurgau</u>	20	<u>Frauenfeld</u>
 <u>Geneva</u>	25	<u>Geneva</u>	 <u>Ticino</u>	21	<u>Bellinzona</u>
 <u>Glarus</u>	8	<u>Glarus</u>	 <u>Uri</u>	4	<u>Altdorf</u>
 <u>Grisons</u>	18	<u>Chur</u>	 <u>Valais</u>	23	<u>Sion</u>
 <u>Jura</u>	26	<u>Delémont</u>	 <u>Vaud</u>	22	<u>Lausanne</u>
 <u>Lucerne</u>	3	<u>Lucerne</u>	 <u>Zug</u>	9	<u>Zug</u>
 <u>Neuchâtel</u>	24	<u>Neuchâtel</u>	 <u>Zürich</u>	1	<u>Zürich</u>

*These cantons are known as half-cantons.

The cantons are federated states. They have a permanent constitutional status and, in comparison with other countries, a high degree of independence. Under the Federal Constitution, all 26 cantons are equal in status, except that 6 (referred to often as the half-cantons) are represented by one councillor instead of two in the Council of States and have only half a cantonal vote with respect to the required cantonal majority in referendums on constitutional amendments. Each canton has its own constitution and its own parliament, government, police and courts.^[92] However, considerable differences define the individual cantons, particularly in terms of population and geographical area. Their populations vary between 16,003 (Appenzell Innerrhoden) and 1,487,969 (Zürich), and their area between 37 km² (14 sq mi) (Basel-Stadt) and 7,105 km² (2,743 sq mi) (Grisons).

Municipalities

As of 2018 the cantons comprised 2,222 municipalities.

Federal City

Until 1848, the loosely coupled Confederation did not have a central political organisation. Issues thought to affect the whole Confederation were the subject of periodic meetings in various locations.^[93]

In 1848, the federal constitution provided that details concerning federal institutions, such as their locations, should be addressed by the Federal Assembly (BV 1848 Art. 108). Thus on 28 November 1848, the Federal Assembly voted in the majority to locate the seat of government in Bern and, as a prototypical federal compromise, to assign other federal institutions, such as the Federal Polytechnical School (1854, the later ETH) to Zürich, and other institutions to Lucerne, such as the later SUVA (1912) and the Federal Insurance Court (1917).^[1] Other federal institutions were subsequently attributed to Lausanne (Federal Supreme Court in 1872, and EPFL in 1969), Bellinzona (Federal Criminal Court, 2004), and St. Gallen (Federal Administrative Court and Federal Patent Court, 2012).

The Old City of Bern

The 1999 Constitution does not mention a Federal City and the Federal Council has yet to address the matter.^[94] Thus no city in Switzerland has the *official* status either of capital or of Federal City. Nevertheless, Bern is commonly referred to as "Federal City" (German: *Bundesstadt*, French: *ville fédérale*, Italian: *città federale*).

Foreign relations and international institutions

Traditionally, Switzerland avoids alliances that might entail military, political, or direct economic action and has been neutral since the end of its expansion in 1515. Its policy of neutrality was internationally recognised at the Congress of Vienna in 1815.^{[95][96]} Swiss neutrality has been questioned at times.^{[97][98]} In 2002 Switzerland became a full member of the United Nations.^[95] It was the first state to join it by referendum. Switzerland maintains diplomatic relations with almost all countries and historically has served as an intermediary between other states.^[95] Switzerland is not a member of the European Union; the Swiss people have consistently rejected membership since the early 1990s.^[95] However, Switzerland does participate in the Schengen Area.^[99]

The Palace of Nations, the European headquarters of the United Nations in Geneva

Many international institutions have headquarters in Switzerland, in part because of its policy of neutrality. Geneva is the birthplace of the Red Cross and Red Crescent Movement, the Geneva Conventions and, since 2006, hosts the United Nations Human Rights Council. Even though Switzerland is one of the most recent countries to join the

The colour-reversed Swiss flag became the symbol of the Red Cross Movement,^[59] founded in 1863 by Henry Dunant.^[100]

United Nations, the Palace of Nations in Geneva is the second biggest centre for the United Nations after the headquarters in New York. Switzerland was a founding member and hosted the League of Nations.^[48]

Apart from the United Nations headquarters, the Swiss Confederation is host to many UN agencies, including the World Health Organization (WHO), the International Labour Organization (ILO), the International Telecommunication Union (ITU), the United Nations High Commissioner for Refugees (UNHCR) and about 200 other international organisations, including the World Trade Organization and the World Intellectual Property Organization.^[95] The annual meetings of the World Economic Forum in Davos bring together business and political leaders from Switzerland and foreign countries to discuss important issues. The headquarters of the Bank for International Settlements (BIS) moved to Basel in 1930.

Many sports federations and organisations are located in the country, including the International Handball Federation in Basel, the International Basketball Federation in Geneva, the Union of European Football Associations (UEFA) in Nyon, the International Federation of Association Football (FIFA) and the International Ice Hockey Federation both in Zürich, the International Cycling Union in Aigle, and the International Olympic Committee in Lausanne.^[101]

Switzerland is scheduled to become a member of the United Nations Security Council for the 2023–2024 period.^[102]

Switzerland and the European Union

Although not a member, Switzerland maintains relationships with the EU and European countries through bilateral agreements. The Swiss have brought their economic practices largely into conformity with those of the EU, in an effort to compete internationally. EU membership faces considerable negative popular sentiment. It is opposed by the conservative SVP party, the largest party in the National Council, and not advocated by several other political parties. The membership application was formally withdrawn in 2016. The western French-speaking areas and the urban regions of the rest of the country tend to be more pro-EU, but do not form a significant share of the population.^{[103][104]}

Members of the European Free Trade Association (green) participate in the European single market and are part of the Schengen Area.

An Integration Office operates under the Department of Foreign Affairs and the Department of Economic Affairs. Seven bilateral agreements liberalised trade ties, taking effect in 2001. This first series of bilateral agreements included the free movement of persons. A second series of agreements covering nine areas was signed in 2004, including the Schengen Treaty and the Dublin Convention.^[105]

In 2006, a referendum approved 1 billion francs of supportive investment in Southern and Central European countries in support of positive ties to the EU as a whole. A further referendum will be needed to approve 300 million francs to support Romania and Bulgaria and their recent admission.

The Swiss have faced EU and international pressure to reduce banking secrecy and raise tax rates to parity with the EU. Preparatory discussions involved four areas: the electricity market, participation in project Galileo, cooperating with the European Centre for Disease Prevention and Control and certificates of origin for food products.^[106]

Switzerland is a member of the Schengen passport-free zone. Land border checkpoints apply on to goods movements, but not people.^[107]

Military

The Swiss Armed Forces, including the Land Forces and the Air Force, are composed mostly of conscripts, male citizens aged from 20 to 34 (in exceptional cases up to 50) years. Being a landlocked country, Switzerland has no navy; however, on lakes bordering neighbouring countries, armed boats patrol. Swiss citizens are prohibited from serving in foreign armies, except for the Swiss Guards of the Vatican, or if they are dual citizens of a foreign country and reside there.

The Swiss militia system stipulates that soldiers keep their army-issued equipment, including fully automatic personal weapons, at home.^[108] Women can serve voluntarily. Men usually receive military conscription orders for training at the age of 18.^[109] About two-thirds of young Swiss are found suitable for service; for the others, various forms of alternative service are available.^[110] Annually, approximately 20,000 persons are trained in recruit centres for 18 to 21 weeks. The reform "Army XXI" was adopted by popular vote in 2003, replacing "Army 95", reducing the rolls from 400,000 to about 200,000. Of those, 120,000 are active in periodic Army training, and 80,000 are non-training reserves.^[111]

A Swiss Air Force F/A-18 Hornet at Axalp Air Show

The newest reform of the military, *Weiterentwicklung der Armee* (WEA; English: Further development of the Army), started in 2018 and was expected to reduce the number of army personnel to 100,000 by the end of 2022.^{[112][113]}

Swiss-built Mowag Eagles of the land forces

Overall, three general mobilisations have been declared to ensure the integrity and neutrality of Switzerland. The first mobilisation was held in response to the Franco-Prussian War of 1870–71; while the second was in response to the First World War outbreak in August 1914; the third mobilisation took place in September 1939 in response to the German attack on Poland.^[114]

Because of its neutrality policy, the Swiss army does not take part in armed conflicts in other countries but joins some peacekeeping missions. Since 2000 the armed force department has maintained the Onyx intelligence gathering system to monitor satellite communications.^[115]

Gun politics in Switzerland are unique in Europe in that 2–3.5 million guns are in the hands of civilians, giving the nation an estimate of 28–41 guns per 100 people.^[116] As per the Small Arms Survey, only 324,484 guns are owned by the military.^[117] Only 143,372 are in the hands of soldiers.^[118] However, ammunition is no longer issued.^{[119][120]}

Economy and labour law

Switzerland has a stable, prosperous and high-tech economy. It is the world's wealthiest country per capita in multiple rankings. The country ranks as one of the least corrupt countries in the world,^{[124][125][126]} while its banking sector is rated as "one of the most corrupt in the world".^[127] It has the world's twentieth largest economy by nominal GDP and the thirty-eighth largest by purchasing power parity. As of 2021, it is the thirteenth largest exporter, and the fifth largest per capita. Zürich and Geneva are regarded as global cities, ranked as Alpha and Beta respectively. Basel is the capital of Switzerland's pharmaceutical industry, hosting Novartis, Roche, and many other players. It is one of the world's most important centres for the life sciences industry.^[128]

The Greater Zürich Area, home to 1.5 million inhabitants and 150,000 companies, is one of the most important economic centres in the world.^[122]

Switzerland had the second-highest global rating in the Index of Economic Freedom 2023,^[129] while also providing significant public services.^[130] On a per capita basis, nominal GDP is higher than those of the larger Western and Central European economies and Japan,^[131] while adjusted for purchasing power, Switzerland ranked 11th in 2017,^[132] fifth in 2018^[133] and ninth in 2020.^[134]

The 2016 World Economic Forum's Global Competitiveness Report ranked Switzerland's economy as the world's most competitive;^[135] as of 2019, it ranks fifth globally.^[136] The European Union labeled it Europe's most innovative country and the most innovative country in the Global Innovation Index in 2023, as it had done in 2022, 2021, 2020 and 2019.^{[137][138][139][140]} It ranked

20th of 189 countries in the Ease of Doing Business Index. Switzerland's slow growth in the 1990s and the early 2000s increased support for economic reforms and harmonisation with the European Union.^{[141][142]} In 2020, IMD placed Switzerland first in attracting skilled workers.^[143]

For much of the 20th century, Switzerland was the wealthiest country in Europe by a considerable margin (per capita GDP).^[144] Switzerland has one of the world's largest account balances as a percentage of GDP.^[145] In 2018, the canton of Basel-City had the highest GDP per capita, ahead of Zug and Geneva.^[146] According to Credit Suisse, only about 37% of residents own their own homes, one of the lowest rates of home ownership in Europe. Housing and food price levels were 171% and 145% of the EU-25 index in 2007, compared to 113% and 104% in Germany.^[147]

Switzerland is home to several large multinational corporations. The largest by revenue are Glencore, Gunvor, Nestlé, Mediterranean Shipping Company, Novartis, Hoffmann-La Roche, ABB, Mercuria Energy Group and Adecco.^[148] Also, notable are UBS, Zurich Insurance, Richemont, Credit Suisse, Barry Callebaut, Swiss Re, Rolex, Tetra Pak, Swatch Group and Swiss International Air Lines.

Switzerland's most important economic sector is manufacturing. Manufactured products include specialty chemicals, health and pharmaceutical goods, scientific and precision measuring instruments and musical instruments. The largest exported goods are chemicals (34% of exported goods), machines/electronics (20.9%), and precision instruments/watches (16.9%).^[147] The service sector – especially banking and insurance, commodities trading, tourism, and international organisations – is another important industry for Switzerland. Exported services amount to a third of exports.^[147]

Agricultural protectionism—a rare exception to Switzerland's free trade policies—contributes to high food prices. Product market liberalisation is lagging behind many EU countries according to the OECD.^[141] Apart from agriculture, economic and trade barriers between the European Union and Switzerland are minimal, and Switzerland has free trade agreements with many countries. Switzerland is a member of the European Free Trade Association (EFTA).

The city of Basel (Roche Tower) is the capital of the country's pharmaceutical industry, which accounts for around 38% of Swiss exports worldwide.^[121]

Switzerland is considered as the "land of Cooperatives" with the ten largest cooperative companies accounting for more than 11% of GDP in 2018. They include Migros and Coop, the two largest retail companies in Switzerland.^[149]

Taxation and government spending

Switzerland is a tax haven.^[150] The private sector economy dominates. It features low tax rates; tax revenue to GDP ratio is one of the smallest of developed countries. The Swiss Federal budget reached 62.8 billion Swiss francs in 2010, 11.35% of GDP; however, canton and municipality budgets are not counted as part of the federal budget. Total government spending is closer to 33.8% of GDP. The main sources of income for the federal government are the value-added tax (33% of tax revenue) and the direct federal tax (29%). The main areas of expenditure are in social welfare and finance/taxes. The expenditures of the Swiss Confederation have been growing from 7% of GDP in 1960 to 9.7% in 1990 and 10.7% in 2010. While the social welfare and finance sectors and tax grew from 35% in 1990 to 48.2% in 2010, a significant reduction of expenditures has been occurring in agriculture and national defence; from 26.5% to 12.4% (estimation for the year 2015).^{[151][152]}

Labour force

Slightly more than 5 million people work in Switzerland;^[153] about 25% of employees belonged to a trade union in 2004.^[154] Switzerland has a more flexible labor market than neighbouring countries and the unemployment rate is consistently low. The unemployment rate increased from 1.7% in June 2000 to 4.4% in December 2009.^[155] It then decreased to 3.2% in 2014 and held steady for several years,^[156] before further dropping to 2.5% in 2018 and 2.3% in 2019.^[157] Population growth (from net immigration) reached 0.52% of population in 2004, increased in the following years before falling to 0.54% again in 2017.^{[147][158]} The foreign citizen population was 28.9% in 2015, about the same as in Australia.^[159]

In 2016, the median monthly gross income in Switzerland was 6,502 francs per month (equivalent to US\$6,597 per month).^[160] After rent, taxes and pension contributions, plus spending on goods and services, the average household has about 15% of its gross income left for savings. Though 61% of the population made less than the mean income, income inequality is relatively low with a Gini coefficient of 29.7, placing Switzerland among the top 20 countries. In 2015, the richest 1% owned 35% of the wealth.^[161] Wealth inequality increased through 2019.^[162]

About 8.2% of the population live below the national poverty line, defined in Switzerland as earning less than CHF3,990 per month for a household of two adults and two children, and a further 15% are at risk of poverty. Single-parent families, those with no post-compulsory education and those out of work are among the most likely to live below the poverty line. Although work is considered a way out of poverty, some 4.3% are considered working poor. One in ten jobs in Switzerland is considered low-paid; roughly 12% of Swiss workers hold such jobs, many of them women and foreigners.^[160]

Education and science

Education in Switzerland is diverse, because the constitution of Switzerland delegates the operation for the school system to the cantons.^[163] Public and private schools are available, including many private international schools.

Primary education

The minimum age for primary school is about six years, but most cantons provide a free "children's school" starting at age four or five.^[163] Primary school continues until grade four, five or six, depending on the school. Traditionally, the first foreign language in school was one of the other Swiss languages, although in 2000, English was elevated in a few cantons.^[163] At the end of primary school or at the beginning of secondary school, pupils are assigned

according to their capacities into one of several sections (often three). The fastest learners are taught advanced classes to prepare for further studies and the matura,^[163] while other students receive an education adapted to their needs.

Tertiary education

Switzerland hosts 12 universities, ten of which are maintained at cantonal level and usually offer non-technical subjects. It ranked 87th on the 2019 Academic Ranking of World Universities.^[164] The largest is the University of Zurich with nearly 25,000 students.^[165] The Swiss Federal Institute of Technology Zurich (ETHZ) and the University of Zurich are listed 20th and 54th respectively, on the 2015 Academic Ranking of World Universities.^[166]

The federal government sponsors two institutes: the Swiss Federal Institute of Technology Zurich (ETHZ) in Zürich, founded in 1855 and the École Polytechnique Fédérale de Lausanne (EPFL) in Lausanne, founded in 1969, formerly associated with the University of Lausanne.^{[m][167][168]}

Eight of the world's ten best hotel schools are located in Switzerland.^[169] In addition, various Universities of Applied Sciences are available. In business and management studies, the University of St. Gallen, (HSG) is ranked 329th in the world according to QS World University Rankings^[170] and the International Institute for Management Development (IMD), was ranked first in open programmes worldwide.^[171] Switzerland has the second highest rate (almost 18% in 2003) of foreign students in tertiary education, after Australia (slightly over 18%).^{[172][173]}

The Graduate Institute of International and Development Studies, located in Geneva, is continental Europe's oldest graduate school of international and development studies. It is widely held to be one of its most prestigious.^{[174][175]}

Science

Switzerland has birthed many Nobel Prize laureates. They include Albert Einstein,^[176] who developed his special relativity in Bern. Later, Vladimir Prelog, Heinrich Rohrer, Richard Ernst, Edmond Fischer, Rolf Zinkernagel, Kurt Wüthrich and Jacques Dubochet received Nobel science prizes. In total, 114 laureates across all fields have a relationship to Switzerland.^{[177][n]} The Nobel Peace Prize has been awarded nine times to organisations headquartered in Switzerland.^[178]

Geneva and the nearby French department of Ain co-host the world's largest laboratory, CERN,^[180] dedicated to particle physics research. Another important research centre is the Paul Scherrer Institute.

Notable inventions include lysergic acid diethylamide (LSD), diazepam (Valium), the scanning tunnelling microscope (Nobel prize) and Velcro. Some technologies enabled the exploration of new worlds such as the pressurised balloon of Auguste Piccard and the Bathyscaphe which permitted Jacques Piccard to reach the deepest point of the world's oceans.

The University of Basel is Switzerland's oldest university (1460).

Some Swiss scientists who played a key role in their discipline (clockwise):

Leonhard Euler (mathematics)
Louis Agassiz (glaciology)
Auguste Piccard (aeronautics)
Albert Einstein (physics)

The LHC tunnel. CERN is the world's largest laboratory and also the birthplace of the [World Wide Web](#).^[179]

The [Swiss Space Office](#) has been involved in various space technologies and programmes. It was one of the 10 founders of the [European Space Agency](#) in 1975 and is the seventh largest contributor to the ESA budget. In the private sector, several companies participate in the space industry, such as [Oerlikon Space](#)^[181] or [Maxon Motors](#).^[182]

Energy

Electricity generated in Switzerland is 56% from [hydroelectricity](#) and 39% from [nuclear power](#), producing negligible CO₂.

On 18 May 2003, two [anti-nuclear](#) referendums were defeated: *Moratorium Plus*, aimed at forbidding the building of new [nuclear power plants](#) (41.6% supported),^[183] and [Electricity Without Nuclear](#) (33.7% supported) after a moratorium expired in 2000.^[184] After the [Fukushima nuclear disaster](#), in 2011 the government announced plans to end the use of nuclear energy in the following 20 to 30 years.^[185] In November 2016, Swiss voters rejected a [Green Party](#) referendum to accelerate the phaseout of nuclear power (45.8% supported).^[186] The Swiss Federal Office of Energy (SFOE) is responsible for energy supply and energy use within the [Federal Department of Environment, Transport, Energy and Communications](#) (DETEC). The agency supports the [2000-watt society](#) initiative to cut the nation's energy use by more than half by 2050.^[187]

Switzerland has the tallest dams in Europe, among which the [Mauvoisin Dam](#), in the Alps. Hydroelectric power is the most important domestic source of energy in the country.

Transport

Entrance of the new [Lötschberg Base Tunnel](#), the third-longest railway tunnel in the world, under the old [Lötschberg railway line](#). It was the first completed tunnel of the greater project [NRLA](#).

The densest rail network in Europe^[59] spans 5,250 kilometres (3,260 mi) and carries over 596 million passengers annually as of 2015.^[188] In 2015, each Swiss resident travelled on average 2,550 kilometres (1,580 mi) by rail, more than any other European country.^[188] Virtually 100% of the network is electrified. 60% of the network is operated by the [Swiss Federal Railways](#) (SBB CFF FFS). Besides the second largest [standard gauge](#) railway company, [BLS AG](#), two railways companies operate on [narrow gauge](#) networks: the [Rhaetian Railway](#) (RhB) in Graubünden, which includes some World Heritage lines,^[189] and the [Matterhorn Gotthard Bahn](#) (MGB), which co-operates with RhB the [Glacier Express](#) between [Zermatt](#) and [St. Moritz/Davos](#). Switzerland operates the [world's longest and deepest railway tunnel](#) and the first flat, low-level route through the Alps, the 57.1-kilometre-long (35.5 mi) [Gotthard Base Tunnel](#), the largest part of the [New Railway Link through the Alps](#) (NRLA) project.

Switzerland has a publicly managed, toll-free road network financed by highway permits as well as vehicle and petrol taxes. The Swiss autobahn/autoroute system requires the annual purchase of a [vignette](#) (toll sticker)—for 40 [Swiss francs](#)—to use its roadways, including passenger cars and trucks. The Swiss autobahn/autoroute network stretches for 1,638 km (1,018 mi) and has one of the highest motorway densities in the world.^[190]

Zurich Airport is Switzerland's largest international flight gateway; it handled 22.8 million passengers in 2012.^[191] The other international airports are Geneva Airport (13.9 million passengers in 2012),^[192] EuroAirport Basel Mulhouse Freiburg (located in France), Bern Airport, Lugano Airport, St. Gallen-Altenrhein Airport and Sion Airport. Swiss International Air Lines is the flag carrier. Its main hub is Zürich, but it is legally domiciled in Basel.

Environment

Switzerland has one of the best environmental records among developed nations.^[193] It is a signatory to the Kyoto Protocol. With Mexico and South Korea, it forms the Environmental Integrity Group (EIG).^[194]

The country is active in recycling and anti-littering programs and is one of the world's top recyclers, recovering 66% to 96% of recyclable materials, varying across the country.^[195] The 2014 Global Green Economy Index placed Switzerland among the top 10 green economies.^[196]

Switzerland has an economic system for garbage disposal, which is based mostly on recycling and energy-producing incinerators.^[197] As in other European countries, the illegal disposal of garbage is heavily fined. In almost all Swiss municipalities, mandatory stickers or dedicated garbage bags allow the identification of disposable garbage.^[198]

Demographics

In common with other developed countries, the Swiss population increased rapidly during the industrial era, quadrupling between 1800 and 1990 and has continued to grow.

The population is about 9 million (2023 est.).^[200] Population growth was projected into 2035, due mostly to immigration. Like most of Europe, Switzerland faces an ageing population, with a fertility rate close to replacement level.^[201] Switzerland has one of the world's oldest populations, with an average age of 42.5 years.^[202]

According to the World Factbook, ethnic groups in Switzerland are as follows: Swiss 69.2%, German 4.2%, Italian 3.2%, Portuguese 2.5%, French 2.1%, Kosovan 1.1%, Turkish 1%, other 16.7% (2020 est).^[203] The Council of Europe figures suggest a population of around 30,000 Romani people in the country.^[204]

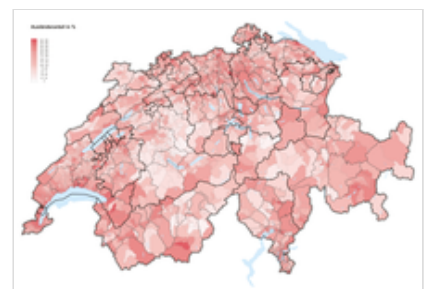

Immigration

As of 2023, resident foreigners made up 26.3% of Switzerland's population.^[14] Most of these (83%) were from European countries. Italy provided the largest single group of foreigners, providing 14.7% of total foreign population, followed closely by Germany (14.0%), Portugal (11.7%), France (6.6%), Kosovo (5.1%), Spain (3.9%), Turkey (3.1%), North Macedonia (3.1%), Serbia (2.8%), Austria (2.0%), United Kingdom (1.9%), Bosnia and Herzegovina (1.3%) and Croatia (1.3%). Immigrants from Sri Lanka (1.3%), most of them former Tamil refugees, were the largest group of Asian origin (7.9%).^[205]

2021 figures show that 39.5% (compared to 34.7% in 2012) of the permanent resident population aged 15 or over (around 2.89 million), had an immigrant background. 38% of the population with an immigrant background (1.1 million) held Swiss citizenship.^{[206][207]}

Population density in Switzerland (2019)

Percentage of foreigners in Switzerland (2019)

In the 2000s, domestic and international institutions expressed concern about what was perceived as an increase in xenophobia. In reply to one critical report, the Federal Council noted that "racism unfortunately is present in Switzerland", but stated that the high proportion of foreign citizens in the country, as well as the generally successful integration of foreigners, underlined Switzerland's openness.^[208] A follow-up study conducted in 2018 reported that 59% considered racism a serious problem in Switzerland.^[209] The proportion of the population that claimed to have been targeted by racial discrimination increased from 10% in 2014 to almost 17% in 2018, according to the Federal Statistical Office.^[210]

Languages

Switzerland has four national languages: mainly German (spoken natively by 62.8% of the population in 2016); French (22.9%) spoken natively in the west; and Italian (8.2%) spoken natively in the south.^{[213][212]} The fourth national language, Romansh (0.5%), is a Romance language spoken locally in the southeastern trilingual canton of Grisons, and is designated by Article 4 of the Federal Constitution as a national language along with German, French, and Italian. In Article 70 it is mentioned as an official language if the authorities communicate with persons who speak Romansh. However, federal laws and other official acts do not need to be decreed in Romansh.

In 2016, the languages most spoken at home among permanent residents aged 15 and older were Swiss German (59.4%), French (23.5%), Standard German (10.6%), and Italian (8.5%). Other languages spoken at home included English (5.0%), Portuguese (3.8%), Albanian (3.0%), Spanish (2.6%) and Serbian and Croatian (2.5%). 6.9% reported speaking another language at home.^[214] In 2014 almost two-thirds (64.4%) of the permanent resident population indicated speaking more than one language regularly.^[215]

National languages in Switzerland (2016):^[212]

- German (62.8%)
- French (22.9%)
- Italian (8.2%)
- Romansh (0.5%)

The federal government is obliged to communicate in the official languages, and in the federal parliament simultaneous translation is provided from and into German, French and Italian.^[216]

Aside from the official forms of their respective languages, the four linguistic regions of Switzerland also have local dialectal forms. The role played by dialects in each linguistic region varies dramatically: in German-speaking regions, Swiss German dialects have become more prevalent since the second half of the 20th century, especially in the media, and are used as an everyday language for many, while the Swiss variety of Standard German is almost always used instead of dialect for written communication (c.f. diglossic usage of a language).^[217] Conversely, in the French-speaking regions, local Franco-Provençal dialects have almost disappeared (only 6.3% of the population of Valais, 3.9% of Fribourg, and 3.1% of Jura still spoke dialects at the end of the 20th century), while in the Italian-speaking regions, the use of Lombard dialects is mostly limited to family settings and casual conversation.^[217]

The principal official languages have terms not used outside of Switzerland, known as Helvetisms. German Helvetisms are, roughly speaking, a large group of words typical of Swiss Standard German that do not appear in Standard German, nor in other German dialects. These include terms from Switzerland's surrounding language cultures (German *Billet*^[218] from French), from similar terms in another language (Italian *azione* used not only as *act* but also as *discount* from German *Aktion*).^[219] Swiss French, while generally close to the French of France, also contains some Helvetisms. The most frequent characteristics of Helvetisms are in vocabulary, phrases, and pronunciation, although certain Helvetisms denote themselves as special in syntax and orthography. Duden, the comprehensive German dictionary, contains about 3000 Helvetisms.^[219] Current French dictionaries, such as the Petit Larousse, include several hundred Helvetisms; notably, Swiss French uses different terms than that of France for the numbers 70 (*septante*) and 90 (*nonante*) and often 80 (*huitante*) as well.^[220]

Learning one of the other national languages is compulsory for all Swiss pupils, hence many Swiss are supposed to be at least bilingual, especially those belonging to linguistic minority groups.^[221] Because the largest part of Switzerland is German-speaking, many French, Italian, and Romansh speakers migrating to the rest of Switzerland and the children of those non-German-speaking Swiss born within the rest of Switzerland speak German. While learning one of the other national languages at school is important, most Swiss learn English to communicate with Swiss speakers of other languages, as it is perceived as a neutral means of communication. English often functions as the de facto lingua franca.^[222]

Health

Swiss residents are required to buy health insurance from private insurance companies, which in turn are required to accept every applicant. While the cost of the system is among the highest, its health outcomes compare well with other European countries; patients have been reported as in general, highly satisfied with it.^{[223][224][225]} In 2012, life expectancy at birth was 80.4 years for men and 84.7 years for women^[226] – the world's highest.^{[227][228]} However, spending on health at 11.4% of GDP (2010) is on par with Germany and France (11.6%) and other European countries, but notably less than the US (17.6%).^[229] From 1990, costs steadily increased.^[230]

It is estimated that one out of six Swiss persons suffers from mental illness.^[231]

According to a survey conducted by Addiction Switzerland, fourteen per cent of men and 6.5% of women between 20 and 24 reported consuming cannabis in the past 30 days in 2020, and 4 Swiss cities were listed among the top 10 European cities for cocaine use as measured in wastewater, down from 5 in 2018.^{[232][233]}

Culture

Swiss culture is characterised by diversity, which is reflected in diverse traditional customs.^[234] A region may be in some ways culturally connected to the neighbouring country that shares its language, all rooted in western European culture.^[235] The linguistically isolated Romansh culture in Graubünden in eastern Switzerland constitutes an

exception. It survives only in the upper valleys of the Rhine and the Inn and strives to maintain its rare linguistic tradition.

Switzerland is home to notable contributors to literature, art, architecture, music and sciences. In addition, the country attracted creatives during times of unrest or war.^[236] Some 1000 museums are found in the country.^[234]

Among the most important cultural performances held annually are the Paléo Festival, Lucerne Festival,^[237] the Montreux Jazz Festival,^[238] the Locarno International Film Festival and Art Basel.^[239]

Alphorn concert in Vals

Alpine symbolism played an essential role in shaping Swiss history and the Swiss national identity.^{[23][240]} Many alpine areas and ski resorts attract visitors for winter sports as well as hiking and mountain biking in summer. The quieter seasons are spring and autumn. A traditional pastoral culture predominates in many areas, and small farms are omnipresent in rural areas. Folk art is nurtured in organisations across the country. Switzerland most directly appears in music, dance, poetry, wood carving, and embroidery. The alphorn, a trumpet-like musical instrument made of wood has joined yodeling and the accordion as epitomes of traditional Swiss music.^{[241][242]}

Religion

Christianity is the predominant religion according to national surveys of Swiss Federal Statistical Office^[b] (about 67% of resident population in 2016–2018^[244] and 75% of Swiss citizens^[245]), divided between the Catholic Church (35.8% of the population), the Swiss Reformed Church (23.8%), further Protestant churches (2.2%), Eastern Orthodoxy (2.5%), and other Christian denominations (2.2%).^[244]

Switzerland has no official state religion, though most of the cantons (except Geneva and Neuchâtel) recognise official churches, either the Catholic Church or the Swiss Reformed Church. These churches, and in some cantons the Old Catholic Church and Jewish congregations, are financed by official taxation of members.^[246] In 2020, the Roman Catholic Church had 3,048,475 registered and church tax paying members (corresponding to 35.2% of the total population), while the Swiss Reformed Church had 2,015,816 members (23.3% of the total population).^{[247][o]}

26.3% of Swiss permanent residents are not affiliated with a religious community.^[244]

As of 2020, according to a national survey conducted by the Swiss Federal Statistical Office,^[b] Christian minority communities included Neo-Pietism (0.5%), Pentecostalism (0.4%, mostly incorporated in the Schweizer Pfingstmission), Apostolic communities (0.3%), other Protestant denominations (1.1%, including Methodism), the Old Catholic Church (0.1%), other Christian denominations (0.3%). Non-Christian religions are Islam (5.3%),^[244] Hinduism (0.6%), Buddhism (0.5%), Judaism (0.25%) and others (0.4%).^[3]

Historically, the country was about evenly balanced between Catholic and Protestant, in a complex patchwork. During the Reformation Switzerland became home to many reformers. Geneva converted to Protestantism in 1536, just before John Calvin arrived. In 1541, he founded the Republic of Geneva on his own ideals. It became known internationally as the *Protestant*

Rome and housed such reformers as Theodore Beza, William Farel or Pierre Viret. Zürich became another reform stronghold around the same time, with Huldrych Zwingli and Heinrich Bullinger taking the lead. Anabaptists Felix Manz and Conrad Grebel also operated there. They were later joined by the fleeing Peter Martyr Vermigli and Hans Denck. Other centres included Basel (Andreas Karlstadt and Johannes Oecolampadius), Bern (Berchtold Haller and Niklaus Manuel), and St. Gallen (Joachim Vadian). One canton, Appenzell, was officially divided into Catholic and Protestant sections in 1597. The larger cities and their cantons (Bern, Geneva, Lausanne, Zürich and Basel) used to be predominantly Protestant. Central Switzerland, the Valais, the Ticino, Appenzell Innerrhodes, the Jura, and Fribourg are traditionally Catholic.

The Swiss Constitution of 1848, under the recent impression of the clashes of Catholic vs Protestant cantons that culminated in the Sonderbundskrieg, consciously defines a consociational state, allowing the peaceful co-existence of Catholics and Protestants. A 1980 initiative calling for the complete separation of church and state was rejected by 78.9% of the voters.^[248] Some traditionally Protestant cantons and cities nowadays have a slight Catholic majority, because since about 1970 a steadily growing minority were not affiliated with any religious body (21.4% in Switzerland, 2012) especially in traditionally Protestant regions, such as Basel-City (42%), canton of Neuchâtel (38%), canton of Geneva (35%), canton of Vaud (26%), or Zürich city (city: >25%; canton: 23%).^[249]

Literature

The earliest forms of literature were in German, reflecting the language's early predominance. In the 18th century, French became fashionable in Bern and elsewhere, while the influence of the French-speaking allies and subject lands increased.^[250]

Among the classic authors of Swiss literature are Jeremias Gotthelf (1797–1854) and Gottfried Keller (1819–1890); later writers are Max Frisch (1911–1991) and Friedrich Dürrenmatt (1921–1990), whose *Das Versprechen* (*The Pledge*) was released as a Hollywood film in 2001.^[251]

Famous French-speaking writers were Jean-Jacques Rousseau (1712–1778) and Germaine de Staël (1766–1817). More recent authors include Charles Ferdinand Ramuz (1878–1947), whose novels describe the lives of peasants and mountain dwellers, set in a harsh environment, and Blaise Cendrars (born Frédéric Sausser, 1887–1961).^[251] Italian and Romansh-speaking authors also contributed to the Swiss literary landscape, generally in proportion to their number.

Jean-Jacques Rousseau was not only a writer but also an influential philosopher of the eighteenth century.

Probably the most famous Swiss literary creation, *Heidi*, the story of an orphan girl who lives with her grandfather in the Alps, is one of the most popular children's books and has come to be a symbol of Switzerland. Her creator, Johanna Spyri (1827–1901), wrote a number of books on similar themes.^[251]

Media

Freedom of the press and the right to free expression is guaranteed in the constitution.^[252] The Swiss News Agency (SNA) broadcasts information in three of the four national languages—on politics, economics, society and culture. The SNA supplies almost all Swiss media and foreign media with its reporting.^[252]

Switzerland has historically boasted the world's greatest number of newspaper titles relative to its population and size. The most influential newspapers are the German-language *Tages-Anzeiger* and *Neue Zürcher Zeitung* NZZ, and the French-language *Le Temps*, but almost every city has at least one local newspaper, in the most common local language.

The government exerts greater control over broadcast media than print media, especially due to financing and licensing. The Swiss Broadcasting Corporation, whose name was recently changed to SRG SSR, is charged with the production and distribution of radio and television content. SRG SSR studios are distributed across the various language regions. Radio content is produced in six central and four regional studios while video media are produced in Geneva, Zürich, Basel, and Lugano. An extensive cable network allows most Swiss to access content from neighbouring countries.

Sports

Ski area over the glaciers of Saas-Fee

Skiing, snowboarding and mountaineering are among the most popular sports, reflecting the nature of the country.^[253] Winter sports are practised by natives and visitors. The bobsleigh was invented in St. Moritz.^[254] The first world ski championships were held in Mürren (1931) and St. Moritz (1934). The latter town hosted the second Winter Olympic Games in 1928 and the fifth edition in 1948. Among its most successful skiers and world champions are Pirmin Zurbriggen and Didier Cuche.

The most prominently watched sports in Switzerland are football and ice hockey.^[255]

The headquarters of the international football's and ice hockey's governing bodies, the International Federation of Association Football (FIFA) and International Ice Hockey Federation (IIHF) are located in Zürich. Many other headquarters of international sports federations are located in Switzerland. For example, the International Olympic Committee (IOC), IOC's Olympic Museum and the Court of Arbitration for Sport (CAS) are located in Lausanne.

Switzerland hosted the 1954 FIFA World Cup and was the joint host, with Austria, of the UEFA Euro 2008 tournament. The Swiss Super League is the nation's professional football club league. Europe's highest football pitch, at 2,000 metres (6,600 ft) above sea level, is located in Switzerland, the Ottmar Hitzfeld Stadium.^[256]

Many Swiss follow ice hockey and support one of the 12 teams of the National League, which is the most attended league in Europe.^[257] In 2009, Switzerland hosted the IIHF World Championship for the tenth time.^[258] It also became World Vice-Champion in 2013 and 2018. Its numerous lakes make Switzerland an attractive sailing destination. The largest, Lake Geneva, is the home of the sailing team Alinghi which was the first European team to win the America's Cup in 2003 and which successfully defended the title in 2007.

Swiss tennis player Roger Federer is widely regarded as among the sport's greatest players. He won 20 Grand Slam tournaments overall including a record 8 Wimbledon titles. He won a joint-record 6 ATP Finals.^[260] He was ranked no. 1 in the ATP rankings for a record 237 consecutive weeks. He ended 2004, 2005, 2006, 2007 and 2009 ranked no. 1. Fellow Swiss players Martina Hingis and Stan Wawrinka also hold multiple Grand Slam titles. Switzerland won the Davis Cup title in 2014.

Motorsport racecourses and events were banned in Switzerland following the 1955 Le Mans disaster with exceptions for events such as hillclimbing. The country continued to produce successful racing drivers such as Clay Regazzoni, Sébastien Buemi, Jo Siffert, Dominique Aegerter, successful World Touring Car Championship driver Alain Menu, 2014 24 Hours of Le Mans winner Marcel Fässler and 2015 24 Hours Nürburgring winner Nico Müller. Switzerland also won the A1GP World Cup of Motorsport in 2007–08 with driver Neel Jani. Swiss motorcycle racer Thomas Lüthi won the 2005 MotoGP World Championship in the 125cc category. In June 2007 the Swiss National Council, one house of the Federal Assembly of Switzerland, voted to overturn the ban, however the other house, the Swiss Council of States rejected the change and the ban remains in place.^{[261][262]}

Traditional sports include Swiss wrestling or *Schwingen*, a tradition from the rural central cantons and considered the national sport by some. Hornussen is another indigenous Swiss sport, which is like a cross between baseball and golf.^[263] Steinstossen is the Swiss variant of stone put, a competition in throwing a heavy stone. Practised only among the alpine population since prehistoric times, it is recorded to have taken place in Basel in the 13th century. It is central to the Unspunnenfest, first held in 1805, with its symbol the 83.5 stone named *Unspunnenstein*.^[264]

Cuisine

The cuisine is multifaceted. While dishes such as fondue, raclette or rösti are omnipresent, each region developed its gastronomy according to the varieties of climate and language, for example, *Zürcher Geschnetzeltes*, engl.: sliced meat Zürich style.^[265] Traditional Swiss cuisine uses ingredients similar to those in other European countries, as well as unique dairy products and cheeses such as Gruyère or Emmental, produced in the valleys of Gruyères and Emmental. The number of fine-dining establishments is high, particularly in western Switzerland.^{[266][267]}

Chocolate has been made in Switzerland since the 18th century. Its reputation grew at the end of the 19th century with the invention of modern techniques such as conching and tempering, which enabled higher quality. Another breakthrough was the invention of solid milk chocolate in 1875 by Daniel Peter. The Swiss are the world's largest chocolate consumers.^{[268][269]}

The most popular alcoholic drink is wine. Switzerland is notable for its variety of grape varieties, reflecting the large variations in terroirs. Swiss wine is produced mainly in Valais, Vaud (Lavaux), Geneva and Ticino, with a small majority of white wines. Vineyards have been cultivated in Switzerland since the Roman era, even though traces of a more ancient origin can be found. The most widespread varieties are the Chasselas (called Fendant in Valais) and Pinot Noir. Merlot is the main variety produced in Ticino.^{[270][271]}

Roger Federer has won 20 Grand Slam singles titles, making him among the most successful men's tennis players ever.^[259]

Fondue is melted cheese, into which bread is dipped.

Notes

- a. Bern is referred to as "federal city" (German: *Bundesstadt*; French: *ville fédérale*; Italian: *città federale*; Romansh: *ciad federala*). Swiss law does not designate a *capital* as such, but the federal parliament and government are installed in Bern, while other federal institutions, such as the federal courts, are in other cities (Bellinzona, Lausanne, Lucerne, Neuchâtel, St. Gallen a.o.).

- b. Since 2010, statistics of religious affiliation in Switzerland provided by the Swiss Federal Statistical Office are based on a national structural survey of 200,000 people aged 15 years and older (corresponding to 2.5% of the total resident population). Data are extrapolated to obtain statistical results for the whole population (aged 15 years and older). These results are estimates subject to some degree of uncertainty indicated by a confidence interval, but by merging samples (pooling) from several years it is possible to get more accurate results, including total number of Protestants and information about minority religions. Note: The figures of the structural survey are not entirely comparable to data collection before 2010 based on census figures (counting every person living in Switzerland) or to annual official numbers of church members.^[243]
- c. Traditional date. The original date of the Rütli Oath was 1307 (reported by Aegidius Tschudi in the 16th century) and is just one among several comparable treaties between more or less the same parties during that period. The date of the Federal Charter of 1291 was selected in 1891 for the official celebration of the "Confederacy's 600th anniversary".
- d. A solemn declaration of the Tagsatzung declared the Federal Constitution adopted on 12 September 1848. A resolution of the Tagsatzung of 14 September 1848 specified that the powers of the institutions provided for by the 1815 Federal Treaty would expire at the time of the constitution of the Federal Council, which took place on 16 November 1848.
- e. There are several definitions. See Geography of Switzerland#Western or Central Europe.
- f. Audio pronunciations:  Germany ,  Austria .
- g. Swiss Standard German spelling and pronunciation. The Swiss German name is sometimes spelled as *Schwyz* or *Schwiiz*, pronounced [ˈʃviːts]. Schwyz is also the standard German (and international) name of one of the Swiss cantons.
- h. The latter is the common Sursilvan pronunciation.
- i. Formerly the Christian Democratic People's Party (CVP/PCD), which merged with the BDP party to form the Centre party in 2019
- j. Since 1999, an initiative can also be in the form of a general proposal to be elaborated by Parliament. Still, because it is considered less attractive for various reasons, this initiative has yet to be used
- k. That is a majority of 23 cantonal votes because the result of the popular vote in the six traditional half-cantons each counts as half the vote of one of the other cantons.
- l. Assumption made in the study: one third of the shares is "not allocable" and has been distributed equally among current regions.
- m. In 2008, the ETH Zürich was ranked 15th in the field *Natural Sciences and Mathematics* by the Shanghai Academic Ranking of World Universities and the EPFL in Lausanne was ranked 18th in the field *Engineering/Technology and Computer Sciences* by the same ranking.
- n. Nobel prizes in non-science categories included.
- o. Precise statistics about the membership of churches among the total population in Switzerland is only available for officially registered and church tax paying members of the Catholic Church in Switzerland and the Protestant Church of Switzerland (*Landeskirchen*).

2. Holenstein, André (2012). "Die Hauptstadt existiert nicht". *UniPress – Forschung und Wissenschaft an der Universität Bern* (scientific article) (in German). 152 (Sonderfall Hauptstadtdregion). Bern: Department Communication, University of Bern: 16–19. doi:10.7892/boris.41280 (<https://doi.org/10.7892%2Fboris.41280>). S2CID 178237847 (<https://api.semanticscholar.org/CorpusID:178237847>). "Als 1848 ein politisch-administratives Zentrum für den neuen Bundesstaat zu bestimmen war, verzichteten die Verfassungsväter darauf, eine Hauptstadt der Schweiz zu bezeichnen und formulierten stattdessen in Artikel 108: "Alles, was sich auf den Sitz der Bundesbehörden bezieht, ist Gegenstand der Bundesgesetzgebung." Die Bundesstadt ist also nicht mehr und nicht weniger als der Sitz der Bundesbehörden." [In 1848, when a political and administrative centre was being determined for the new federation, the founders of the constitution abstained from designating a capital city for Switzerland and instead formulated in Article 108: "Everything, which relates to seat of the authorities, is the subject of the federal legislation." The federal city is therefore no more and no less than the seat of the federal authorities.]

Retrieved 8 April 2015. "Wie es um die Kundenzufriedenheit in der Branche generell steht, zeigt eine 2013 im Auftrag von "K-Tipp" durchgeführte repräsentative Umfrage unter Versicherten, die in den vergangenen zwei Jahren Leistungen von ihrer Krankenkasse in Anspruch genommen haben. Beim Testsieger Concordia waren rund 73% der Versicherten "sehr zufrieden". Bei grossen Krankenkassen wie der CSS und Helsana betrug dieser Anteil 70% beziehungsweise 63%. Groupe Mutuel erreichte rund 50%, und die Billigkasse Assura kam auf 44%. Dies illustriert, dass die Zufriedenheit durchaus hoch ist – dass es aber auch Potenzial für Effizienzsteigerungen bei Krankenkassen gibt."
